

Press release on the publication of
“Japanese State-of-the-art Smart Energy Products & Technologies”
Japanese Business alliance for Smart Energy Worldwide(JASE-World)

Climate change and economic crisis are two of the most important issues the world is facing. Countries around the globe urgently need to promote energy efficiency and increase the deployment of non-fossil energy sources.

Last October, a group of leading Japanese businesses gathered together to establish the “Japanese Business Alliance for Smart Energy Worldwide (JASE-World)”, a business alliance to serve as a hub to promote products, technologies and systems related to energy efficiency and non-fossil energies on a commercial basis worldwide. JASE-world hopes that the increase in use of energy efficient products/technologies worldwide will be an important contribution to the alleviation of climate change.

Outline of the Alliance: <http://www.jase-w.eccj.or.jp>

As one of the most important activities of JASE-world, we have published “Japanese State-of-the-art Smart Energy Products & Technologies“ which is a compilation of 162 of the Japanese newest energy efficient products, technologies, knowhow and methodology, etc that is owned by our members.

- Provides information on the features of the product/technology using easy to understand pictures and charts to enhance readability
- Classifies products and technologies into 7 sectors for easy reference. Residence, Office, Factory, Construction & Transportation, Electricity, Iron& Steel, Petrochemicals
- Provides contact points for easy access to further information.
- Can easily be downloaded from the website of JASE-world
